### Lengths:

Designed to fit your life, with three lengths available, there is a PEUGEOT Expert Combi to suit everyone. The three different lengths are made up of a combination of two different wheelbase lengths and two rear overhangs. The three lengths are as follows:

**Compact:** Measuring in at 4.60m in length, Compact combines a shorter wheelbase with a short rear overhang for optimum manoeuvrability .

**Standard:** Measuring in at 4.95m in length, Standard combines a longer wheelbase with a short rear overhang . Standard length provides the perfect balance between manoeuvrability and practicality. The longer wheelbase provides extra rear seat legroom and a larger boot area whilst the compact rear overhang ensures a comfortable fit within car park spaces.

**Long:** Measuring in at 5.30m in length, Long combines a long wheelbase with a long rear overhang for optimum practicality. Perfect for larger families or VIP transportation. PEUGEOT recommend the fitment of the optional third row seats to take full advantage of the cavernous levels of space available.

All versions of PEUGEOT Expert Combi are limited to a height of 1.9m , this allows easy access to height restricted car parks.

The fuel consumption you achieve, and CO2 produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP\*) used to measure fuel consumption and CO2 figures. The CO2 figures shown are NEDC equivalent, calculated using EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC\*\*) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO2 figures with other vehicles tested using the same technical standard.

\*WLTP - Worldwide harmonized Light vehicles Test Procedure. \*\*NEDC - New European Driving Cycle.

^ 'LOW': Low speed city driving, representative of city centre driving, maximum 35mph.

^^ 'MEDIUM': Medium speed town driving, representative of town or suburban driving, maximum 50mph.

^^^ 'HIGH': High speed rural driving, representative of A-road or dual carriageway driving, maximum 60mph.

^^\* 'EXTRA HIGH': Extra High speed motorway driving, representative of a typical European motorway, maximum 81mph.

^^^\* 'COMBINED': A mixed journey average of all elements
